

ABIM[®] 2024

Annual Biocontrol Industry Meeting[®]

ABIM has been the unrivalled meeting place for the biocontrol industry since 2006. The conference takes place every year in October at the Congress Center Basel, Switzerland. It is internationally recognised as the place where new products are discovered and introduced, market opportunities are discussed, new research results are presented, information on the current legal situation is obtained and contacts are made with specialist colleagues from all over the world. During the three days at ABIM 2023, over 1800 attendees from 58 countries, representing more than 500 companies and organisations from around the world took part to network, share experiences and gain information on the latest products and developments in the global market. ABIM is organised by ABIM AG, and is owned by IBMA and FiBL, which each hold 50% of the shares.

**120 exhibitors and
1800 attendees from
58 countries**
