

UPP Biostimulant Range

Targeted to Unlock Plant Potential

Shoot-UPP®

A blend of Triacontanol and ascorbic acid in an amino acid base for the stimulation of photosynthesis and vegetative growth along with stress relief in crops.

Root-UPP®

A unique blend of the specific amino acids L-Tryptophan and L-Methionine in a kelp (*E. maxima*) base, to promote root development and synergy with beneficial microorganisms.

Set-UPP®

A formulation of brassinolide in an amino acid and seaweed base for enhancing fruit set and improving tolerance to abiotic stress.
