

# V<sup>12</sup> Product Range

Powering Plant Vitality  
with Staged Nutrition

## V<sup>12</sup> Multi<sup>®</sup>

A high-quality, all-in-one biostimulant formulation, incorporating a full spectrum of plant-available nutrients, stimulants and vitamins. To support crops through all growth stages, particularly during stress or high demand.

## V<sup>12</sup> Micro<sup>®</sup>

Plant nutrition formulated to contain a broad spectrum of micro elements to quickly and effectively prevent or combat a range of micronutrient deficiencies.

## V<sup>12</sup> Initiate<sup>®</sup>

Unique plant nutrition, including slow-release calcium and silica to support the crop during germination and initial crop growth stages or during periods of root flushes.

## V<sup>12</sup> Shoot

A targeted biostimulant incorporating essential micronutrients such as Mg; Mn; Fe and Mo and stimulants (Triaccontanol; amino acids). Tailored to support and optimise photosynthesis to promote plant growth and vitality, particularly during periods of vegetative growth.
